

Wow!! What a year..

Here are some news from us!

Our Company, OkyayTech is an ALD company since 2014. We have over 15 years of ALD research experience. We developed our system for our founder's own research needs. Now we are providing custom tools for cutting edge research.

In 2017, we doubled our equipment sales compared to 2016. OkyayTechALD systems are currently running in US and European institutions.

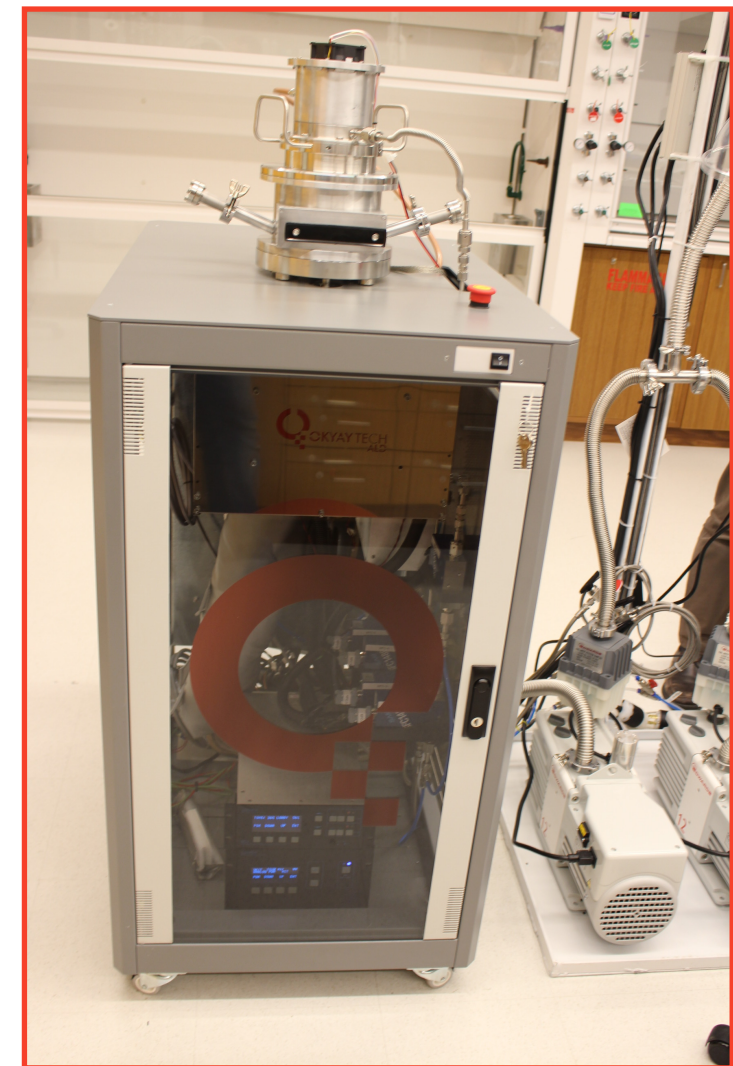

Since our first day, OkyayTechALD systems have played key roles in various functional coating research areas such as IC/MEMS packaging, bio/microfluidic technologies and smart surface treatment.

In 2017, we developed Plasma ALD system in collaboration with Meaglow and delivered two such systems to universities in the US.

OkyayTech increased capacity with a new production plant, and a branch in the US to provide onsite installation and maintenance support for customers in North America.

Happy 2018!!

We wish you a successful and happy year with your beloved ones.
